PROJECT

PRESENTATION

STUDENT PERFORMANCE TRACKER

PROBLEM STATMENT

1. **Student progress is hard to track** because information is spread out in different places.
2. **Teachers often find problems too late**, when students are already struggling.
3. **Supports are confusing** and don’t show clearly how students are doing over time.
4. **Every student learns differently**, but schools don’t always have tools to support that.
5. **Parents and students don’t get regular updates**, so they don’t know

OBJECTIVES

1.Track Student Progress

2. Identify Learning Gaps

3.Improve Communication

4. Boost Overall Performance

TOOL USED

TO DEVELOP THIS APPLICATION WE USED:

HTML
CSS
JS
WEB CHROME
VS CODE
WEB APPLICATION SOFTWARE (NO BACKEND)

PROJECT CODE

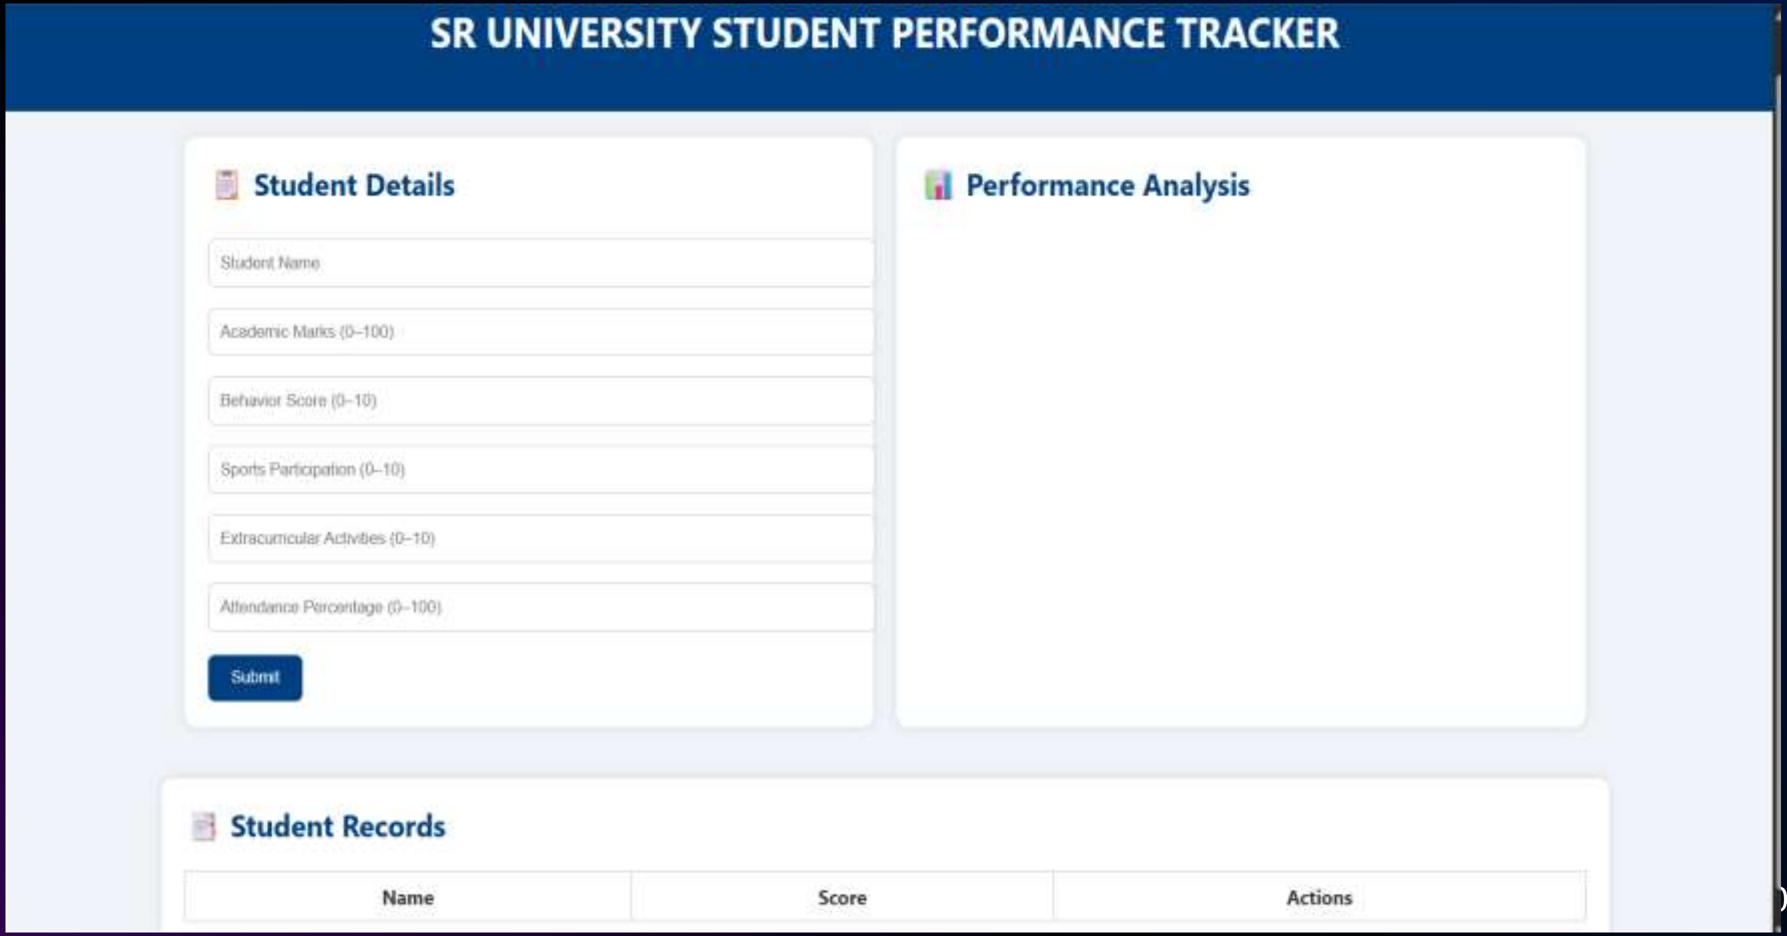
FRONTEND VIEW



CONCLUSION

The Student Performance Tracker is a robust, user-friendly web application designed to evaluate and visualize student performance across academic, behavioral, and extracurricular domains

Real-time calculation of overall performance using a weighted formula Dynamic feedback with compliments and identification of weak areas Interactive bar chart visualization for category-wise contribution
